

SN97C(032K)

Lead-Free
Flux-Cored Solder Wire

Alloy Composition : Sn-3.0Ag-0.5Cu

Solving the Laser Soldering Problems of Slow Wetting and Spattering

A laser-compatible flux-cored solder wire is now available from Nihon Superior. Resolves problems associated with high-temperature and high-speed laser soldering such as slow wetting and flux spattering.

032K Features

Compatible with
Laser Soldering

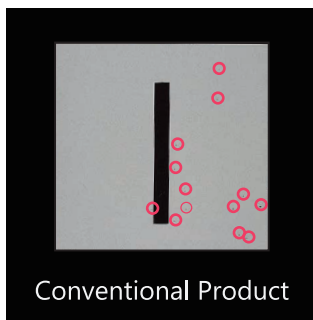

Reduced Flux
Spattering

No Cl or Br
in the Formulation

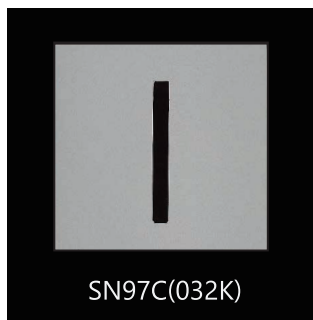

Wets Faster

Spattering Test

FLUX SPATTERING
